Metawatch adds revolutionary Epson 2 Part Spongeless Cartridge line.

What is a 2 part spongeless cartridge?

Specifically designed for Epson printers this revolutionary cartridge comes in 2 parts. One central part containing the electronics, and a separate replaceable spongeless ink cartridge tank.

What advantage is there by having a spongeless cartridge?

By removing the sponge and designing a free flow ink system there is more space available for ink in the same volume of cartridge allowing for **DOUBLE** the quantity of ink in most cartridges. Now one cartridge can last up to twice as long between changes at a fraction of the cost of 2 cartridges.

What is the advantage of 2 part Cartridges ?

Now when your ink cartridge runs out of ink you only have to replace the tank, not the tank and the electronics. By separating these 2 components, replacement tanks can be manufactured and sold at a reduced price. Note: You also must purchase or have a "Chip Resetter" to allow you to reset the electronics to indicate a full tank cartridge is being installed.

What is a "Chip Resetter" ?

It is a small plastic box that allows you to reset the electronics circuit on the cartridge that is used by Epson to monitor ink consumption.

Where can I purchase a "Chip Resetter" ?

Metawatch has been selling chip re-setters for years and

you can find it on our Web Site at [Epson Chip Resetter](#) or Search for XR-22 in the search menu.

Are there any other advantages?

Yes. Longer shelf life ! Removal of the sponge from the cartridge eliminates chemical reaction of the sponge and ink, greatly increasing shelf life.
